

Preheater

Compact and powerful preheater for rapid heating e.g. of the cooling water circuit. Integrated display with temperature indication and temperature presetting. Container for fluid storage and integration of other heating circuits optional

FORM

- Dimensions standard: 400 mm x 230 mm x 245 mm
- Weight standard: 10,7 kg
- Powder coated aluminum housing with handle, color according to customers specifications

FIT

- LiTec QDV device related, other QDVs on customers request
- Filling hose vehicle related according to customers specifications
- Power supply: 380 / 220 VAC (adapter with automatic adjustment of supply voltage on customers request)

FUNCTION

- Heating power: 6 kW (380 VAC) – 3 kW (220 VAC)
- Flow rate pump: free flow 6,1 l/min; maximum pressure 4,1 bar
- Temperature range up to 85°C; higher temperatures on customers request
- Medium standard: Cooling water (with glycol)
- Individual controlling of all components (display, pump und heating elements) according to customers specifications
