

## ASOV Automatic Shut-Off Valve

### – according to FIA Appendix J, Article 253 3.3

Compact and light weight shut-off valve for the fuel system;  
identification of leakage by pressure loss; flow-optimized design with  
minimized pressure drop for the entire fuel system.

SOBEK Article no.: Z-V 0067 0110

#### FORM

- Weight 60 g
- Length 65,4 mm
- Material EN-AW 7075, anodized surface

#### FIT

- IN: 9/16-18UNF / -06 female  
other connectors on request
- OUT: 9/16-18UNF / -06 male  
other connectors on request
- Application: Fuel system

#### FUNCTION

- Automatic shut-off in case of leakage in the fuel system
- Opening pressure 4,0 bar / closing pressure 3,2 bar
- Pressure build-up via internal bypass hole
- Priming by red sliding knob
